What is this product?

Type : Flexible, income accumulation

Objectives : The Fund is actively managed and aims to achieve capital growth and generate income. The Fund does not refer to a Benchmark.

Investment Policy:To achieve these objectives, the Fund invests primarily in a diversified portfolio of international bonds and equities and money market instruments including through Undertakings for Collective Investment in Transferable Securities (UCITS) and/or other Undertakings for Collective Investment (UCIs). The Fund may invest up to 40% of its net assets in equities and other similar financial instruments and may use derivatives for hedging purposes. The Fund's investment decisions are made on a discretionary basis. The value of the Fund is calculated and expressed in Euros

Redemption:The frequency of partial or total Redemption held by unitholders is aligned with the frequency of calculation of the unit value of the unit, which is determined on a daily basis, except on days when national stock exchanges are closed and on public holidays, when national stock exchanges are also open.

Maturity : The Fund is established without limits of duration

Intended retail investor : The Fund is intended for a Retail Client with a minimum level of theoretical knowledge and financial experience, with a moderate ability to bear financial losses, and who aims to achieve growth in invested capital, over a recommended time horizon of at least 5 years, consistent with the level of risk assumed. In accordance with the Regulations, the Fund may be subscribed for an amount, net of subscription fees and expenses, of not less than 2.500 euros.

What are the risks and what could I get in return?

Risk indicator

The synthetic risk indicator assumes that the product is held for 5 years and is an indicative indication of the level of risk of this product compared to other products. It expresses the probability that the product will suffer monetary losses due to movements in the market or due to our inability to pay you what is due. We ranked this product at level 2 out of 7, which corresponds to a low risk class. This means that potential losses due to the future performance of the product are ranked in the low level and that poor market conditions are very unlikely to affect the ability to pay you what is due. This product does not include any protection from future market performance, so you may lose all or part of your investment. If we are unable to pay you what is due, you may lose your entire investment.

Performance scenarios

Investment : € 10.000

Scenarios		1 year	5 years *
Minimum	There is no guaranteed minimum return		
Stress scenario	What you might get back after costs	€ 8.200	€ 7.950
	Average return each year	-18,0%	-4,5%
Unfavourable scenario	What you might get back after costs	€ 8.780	€ 8.830
	Average return each year	-12,2%	-2,5%
Moderate scenario	What you might get back after costs	€ 10.120	€ 10.080
	Average return each year	1,2%	0,2%
Favourable scenario	What you might get back after costs	€ 11.110	€ 11.000
	Average return each year	11,1%	1,9%

* Recommended holding period

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include reference/proxy index variables, over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Ersel Gestion Internationale S.A. is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary, CACEIS Bank Luxembourg Branch. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the insolvency of the Depositary or a delegate thereof, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations.

What are the costs?

The expenses incurred are used to cover the management costs of the Fund including the costs of marketing and distribution of the Fund. These expenses reduce the potential return on the investment. The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

Costs over time

Investment : € 10.000

	If you cash in after 1 year	If you cash in after 5 years
Total costs	€ 167	€ 870
