This Fund is managed by Ersel Gestion Internationale S.A.

Objectives and investment policy

This Fund is actively managed and seeks to grow capital and to generate income. The Fund has no reference Benchmark. In order to achieve the above said aims the Fund invests mainly in different classes of international bonds and equities, and in money market instruments also through Undertakings for Collective Investments in Transferable Securities (UCITS) and/or other Undertakings for Collective Investments (UCIs).
The maximum investment percentage in equities may not exceed 50% of the net value of the Fund.
Up to 50% of the Fund's assets may be invested in bonds.
The Fund will not invest more than 30% of its net assets in transferable securities of a bond nature, denominated in euros or foreign currencies, with a rating below investment Grade.
In order to achieve the above aims the Fund can use derivatives not only for hedging purposes.
The Fund's investment decisions are made on a discretionary basis.
Any income received by the Fund is reinvested.
The Fund's value is calculated and expressed in Euros.
Investors can buy or sell shares of the Fund on a daily basis (full bank business day).

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 3 reflects limited potential gains and/or losses for the portfolio. This is due to investments in diversified portfolio of bonds and mutual funds that invest in bond and equity securities on the international market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Counterparty risk: The counterparty risk may occur due to the fact that the Fund might have exposure through over-the-counter contracts with third parties.
