What is this product?

Type : Flexible, Income Accumulation

Objectives : The Fund is actively managed and aims to achieve gradual capital appreciation within a reasonable level of risk.

Investment Policy: The Fund Manager uses fundamental analysis to select long and short investments, mainly in equities, both in the form of equities and OTC derivatives. The Fund has no Benchmark. In order to implement the investment strategy, the Fund will invest mainly in various classes of international financial instruments, mainly equities and equity derivatives and, residually, in bonds, money market instruments and other derivatives. In particular, the Fund may use OTC derivatives (e.g. equity swaps) to create long and short exposure. The Fund may also invest tactically in ADRs (American Certificates of Deposit) or GDRs (Global Certificates of Deposit). All bonds will be investment grade. The Fund may invest in instruments denominated in currencies other than the euro. The securities in which the Fund will invest will be issued primarily by issuers in the US, European and emerging markets, with a limit of thirty percent (30%) in securities issued by emerging market issuers. In addition, the Fund may:

- invest residually in money market instruments with a maturity of less than twelve (12) months
- hold cash up to a maximum of thirty percent (30%) of its net assets
- invest up to ten percent (10%) of its net assets in UCITS, including UCITS ETFs, or other UCIs referred to in art. 41, section 1, of the Law of 2010
- make use of financial derivative instruments aimed at promoting efficient portfolio management, subject to the limits set out in the chapter "Financial Techniques and Instruments" of the prospectus. While in general, the Fund may not:
- invest in securities traded on the Russian Micex RTS market. In its investment decisions, the Fund takes into account the sustainability risks and ESG criteria contained in the chapter "ESG Criteria and Sustainability Risks" of the prospectus. The value of the Fund is calculated and expressed in Euro.

Redemption: The frequency of partial or total Redemption held by unitholders is aligned with the frequency of calculation of the unit value of the unit, which is determined on a daily basis, except on days when the national stock exchanges are closed and on national holidays when the national stock exchanges are open.

Maturity : The Fund is established without limits of duration

Intended retail investor : The Fund is intended for a retail client with a minimum level of theoretical knowledge and financial experience, with a moderate capacity to bear financial losses and who aims to obtain growth of the invested capital, over a recommended time horizon of at least 5 years, consistent with the level of risk assumed. In accordance with the Rules, this class of the Fund may be subscribed for an amount, net of subscription charges and expenses, of not less than EUR 2,500.

What are the risks and what could I get in return?

Risk indicator	1	2	3	4	5	6	7
	LOWER RISK					HIGHER RISK	

The synthetic risk indicator assumes that the product is held for 5 years and is an indicative indication of the level of risk of this product compared to other products. It expresses the probability that the product will suffer monetary losses due to movements in the market or due to our inability to pay you what is owed. We have rated this product at level 3 out of 7, which corresponds to a medium-low risk class. This rates the potential losses from future performance at a medium-low level and poor market conditions are unlikely to impact our capacity to pay you. This product does not include any protection from future market performance, so you may lose all or part of your investment

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include reference/proxy index variables, over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Ersel Gestion Internationale S.A. is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary, CACEIS Bank Luxembourg Branch. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the insolvency of the Depositary or a delegate thereof, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations.

What are the costs?

The expenses incurred are used to cover the management costs of the Fund including the costs of marketing and distribution of the Fund. These expenses reduce the potential return on the investment. The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
