

Monthly review

The first half of August saw an upward movement in global equity markets, supported by broad-based contributions across both regions and sectors. Within this generally positive environment, energy stocks moved against the trend during the first week, weighed down by news flow related to the conflict between the United States and Iran. The second half of the month, however, was characterized by a modest pullback from the highs: rising oil prices and higher government bond yields worsened the investment backdrop, increasing uncertainty among investors. The performance of the Leadersel Global Equity - Walter Scott fund broadly mirrored that of the markets, although the overall results mask more pronounced fluctuations within the portfolio. In the technology sector, in particular, several stocks that had been heavily penalized by concerns over potential competition from Artificial Intelligence staged strong rebounds. Adobe, for example, gained almost 16%, while Intuit rose by more than 12%. Notably, these advances occurred alongside positive performances from companies at the forefront of AI development, such as Nvidia and ASML. Within the healthcare sector, investor interest returned to medical technology companies, including Edwards Lifesciences, a leader in minimally invasive cardiac surgery, and Intuitive Surgical, one of the world's leading surgical robotics companies. Portfolio performance therefore benefited from these positive contributions, while exposure to traditional pharmaceutical and biotechnology companies remained less significant. Offsetting an otherwise positive month were consumer-related sectors, whose weakness affected both luxury goods companies, such as the French group Louis Vuitton, and businesses focused on value-oriented retail, such as the U.S.-based The TJX Companies.

Investment objective

The sub-fund primarily invests in equity instruments denominated in euros, US dollars, and Asian currencies, targeting issuers located in the European Union, North America, and the Pacific region. Investments span companies with varying market capitalizations and liquidity profiles and are diversified across all economic sectors. The main objective of the sub-fund is long-term capital appreciation (typically over an investment horizon exceeding five years) with a high risk profile. The investment philosophy is rooted in fundamental analysis, both at the sector level and at the level of individual companies. Accordingly, investment decisions are based on research focused on earnings prospects, valuation metrics, cash flow analysis, and risk management, with technical analysis playing only a secondary role. Portfolio management has been delegated to Walter Scott Partners Ltd., a Scottish asset management firm established in 1983, recognized for its strong track record in global equity markets.
