

Monthly review

Global equity markets were up in March, unresponsive to the escalation in Ukraine and Israel, thanks to expectations of an imminent rate cut both in Europe and US. Globesel Alkimis Equity was up 2.56% in the month.

The result is due to a strong alpha generation of our long and short portfolio, mainly in IT and Financials, only partially penalized by Materials.

Best contributors: Bff (long, +15%), Unicredit (long, +14%), Commerzbank (long, +19%) and Citigroup (long, +11%) within Financials, Nvidia (long, +14%), Micron (long, +30%) and Tietonator (short, -6%) within IT, and Adidas (long, +11%) and Stellantis (long, +9%) within Consumers.

Worst contributors: Stora (short, +11%) and International Paper (short, +10%) in the Materials book. Very negative performance also from Aia (long, -17%), within Financials, closed during the month.

Gross exposure stands at 107% and net at around 39%, both stable. With the exception of a 10% in US\$, all currencies are hedged.

Performance fee	20% calculated on the positive net return of the Sub-Fund. This fee is calculated with reference to each Valuation Day and will be accrued and due only if the net value of the unit exceeds the highest value attained prior to the Valuation Day ("High Watermark"). The net return of the Sub-Fund is calculated after the management commission is deducted. The performance fee is paid on an annual basis. If the Sub-Fund pays a dividend, the amount distributed will be deducted from the reference net asset value. The Performance Fee charged to the Sub-Fund may not exceed 3 per cent of the average overall net asset value in the calendar year in which the performance fee is paid.

Investment objective

The Sub-Fund aims to achieve gradual capital appreciation commensurate with reasonable risk. In pursuing this objective, the Sub-Fund's Manager uses fundamental analysis to select long and short investments mainly in equity exposure; both equity securities and OTC derivatives. The Funds seeks to deliver excess return ("alpha") by identifying and exploiting relative misvaluations across and within global equity markets. Long or short equity investment decisions are taken to capitalise on alpha generating opportunities.
