What is this product?

Type : Emerging market equities, income accumulation

Objectives : The Fund aims to increase the value of the invested capital over time and to generate income. The Fund is actively managed.

The Fund does not seek to replicate the composition of the benchmark, it therefore also invests in financial instruments not present in the indices or present in different proportions.

Investment Policy: The Fund invests mainly in Undertakings for Collective Investment in Transferable Securities (UCITS) and/or other Undertakings for Collective Investment (UCIs), typically investing in a broadly diversified portfolio of emerging market equities. In line with its investment policy, the Fund may use derivatives not only for hedging purposes. The Fund's investment decisions are made on a discretionary basis. The Fund's value is calculated and expressed in Euro.

Redemption: The frequency of partial or total Redemption held by unitholders is weekly, with the Redemption Day being every Friday or, if it coincides with a closed market day or a bank holiday, the following day.

Maturity : The Fund is established without limits of duration

Intended retail investor : The Fund is aimed at a retail client with an adequate level of theoretical knowledge and financial experience, who has the capacity to bear potentially high financial losses and who aims to obtain growth in the capital invested, over a recommended time horizon of at least 5/10 years, consistent with the level of risk assumed. According to the Rules, the Fund may be subscribed for an amount, net of subscription charges and expenses, of not less than EUR 2,500.

What are the risks and what could I get in return?

Risk indicator

The synthetic risk indicator assumes that the product is held for 10 years and is an indicative indication of the level of risk of this product compared to other products. It expresses the probability that the product will suffer monetary losses due to movements in the market or due to our inability to pay you what is due. We ranked this product at level 4 out of 7, which corresponds to a medium risk class. This means that potential losses due to the future performance of the product are ranked in the medium level and that poor market conditions could affect the ability to pay you what is due. This product does not include any protection from future market performance, so you may lose all or part of your investment. If we are unable to pay you what is due, you may lose your entire investment.

Performance scenarios

Investment : € 10.000

Scenarios		1 year	5 years	10 years *
Minimum	There is no guaranteed minimum return			
Stress scenario	What you might get back after costs	€ 4.850	€ 4.340	€ 2.910
	Average return each year	-51,4%	-15,4%	-11,6%
Unfavourable scenario	What you might get back after costs	€ 7.510	€ 8.010	€ 9.760
	Average return each year	-24,9%	-4,4%	-0,2%
Moderate scenario	What you might get back after costs	€ 10.340	€ 11.410	€ 12.450
	Average return each year	3,4%	2,7%	2,2%
Favourable scenario	What you might get back after costs	€ 14.840	€ 15.690	€ 15.890
	Average return each year	48,4%	9,4%	4,7%

* Recommended holding period

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include reference/proxy index variables, over the last 15 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Ersel Gestion Internationale S.A. is unable to pay out?

The assets of the Fund are held in safekeeping by its Depositary, CACEIS Bank Luxembourg Branch. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the insolvency of the Depositary or a delegate thereof, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations.

What are the costs?

The expenses incurred are used to cover the management costs of the Fund including the costs of marketing and distribution of the Fund. These expenses reduce the potential return on the investment. The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

Costs over time

Investment : € 10.000

	If you cash in after 1 year	If you cash in after 5 years	If you cash in after 10 years
Total costs	€ 267	€ 1.606	€ 3.753
