## What is this product?

**Type** : Equity Italy, Income Distribution

**Objectives** : The Fund aims to increase the value of the invested capital over time and to generate income. The Fund is actively managed.

**Investment Policy**: In pursuing its investment policy, the Fund may invest in equities of companies of any sector, with high or medium-low capitalisation and, under certain conditions, also in money market instruments and bonds. In addition, the Fund will invest at least 70% of the portfolio in financial instruments (shares and/or bonds, it being understood that for the portion invested in bonds a 30% limit applies) issued by or made with companies resident in Italy or in the EU or in an EEA Member State and having a permanent establishment in Italy. At least 30% of these financial instruments will be issued by companies not listed in the FTSE MIB index or other equivalent indexes. Further investment limits are then:

- a maximum of 10% of the portfolio in financial instruments issued by or entered into with the same company or companies belonging to the same group, nor in cash deposits, unless they are held at the Fund's custodian bank
- the prohibition to invest in financial instruments issued by companies not resident in countries that allow an adequate exchange of information with Italy
- a maximum of 10% of net assets in Undertakings for Collective Investment in Transferable Securities (UCITS) or other Undertakings for Collective Investment (UCIs).

The Fund may use financial techniques and instruments to hedge the exposure of the portfolio. The value of the Fund is calculated and expressed in Euro. Note: The Fund qualifies as an "Individual Long-Term Savings Plan" (PIR) pursuant to Italian Budget Law no. 232 of 11 December 2016, subsequently amended by Law no. 157 of 19 December 2019 (pursuant to art. 13bis DL 26. 10. 2019 no. 124)

**Redemption**: The frequency of partial or total redemption of the units held by unitholders is aligned with the frequency of calculation of the unit value of the unit, determined on a daily basis, except on days when the National Stock Exchanges are closed and on national holidays, when the National Stock Exchanges are also open.

**Maturity** : The Fund is established without limits of duration

**Intended retail investor** : This class of the Fund is intended for institutional investors. Pursuant to the Regulations, the Fund may be subscribed for an amount, net of subscription fees and expenses, of not less than €2,000,000.

## What are the risks and what could I get in return?

Risk indicator 

1	2	3	4	5	6	7
---	---	---	---	---	---	---

  
 LOWER RISK HIGHER RISK

The synthetic risk indicator assumes that the product is held for 7 years and is an indicative indication of the level of risk of this product compared to other products. It expresses the probability that the product will suffer monetary losses due to movements in the market or due to our inability to pay you what is due. We ranked this product at level 4 out of 7, which corresponds to a medium risk class. This means that potential losses due to the future performance of the product are ranked in the medium level and that poor market conditions could affect the ability to pay you what is due. This product does not include any protection from future market performance, so you may lose all or part of your investment. If we are unable to pay you what is due, you may lose your entire investment.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include reference/proxy index variables, over the last 12 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What happens if Ersel Gestion Internationale S.A. is unable to pay out?**

The assets of the Fund are held in safekeeping by its Depositary, CACEIS Bank Luxembourg Branch. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the insolvency of the Depositary or a delegate thereof, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations.

**What are the costs?**

The expenses incurred are used to cover the management costs of the Fund including the costs of marketing and distribution of the Fund. These expenses reduce the potential return on the investment. The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
